

We are students of ETH who help you with linux at our events and in our office. For free!

Because we love Open Source and Free Software and want to help you to get started.

Events

Come to our LinuxDays; a series of talks for beginners and advanced users alike. Learn the basics of how to use Linux in your studies

Introduction to Free Software and Linux

We reason why Free and Open Source Software (FOSS) matters, and present you Linux, the operating system used by most (all?) serious scientists and normal users alike.

Install Events

Get started with Linux by installing it on your computer: Bring your laptop and charger, we will personally assist you with the installation.

Console Toolkits & Bash Scripting Workshops

Learn how to utilize the console with some useful terminal applications. You will solve small exercises, and get used to it in no time.

Spotlights

In our Spotlights, every semester we look at different advanced topics. This semester, an advanced VIM user shows you some tricks, and Unix history is discussed.

Visit us on thealternative.ch for the dates & locations of the courses.
